

Niue as a village of 100

Health and disability highlights

1,564 usual residents were in Niue on Census Night (11 November 2022)
This means in our village of 100, each person represents around 16 people.

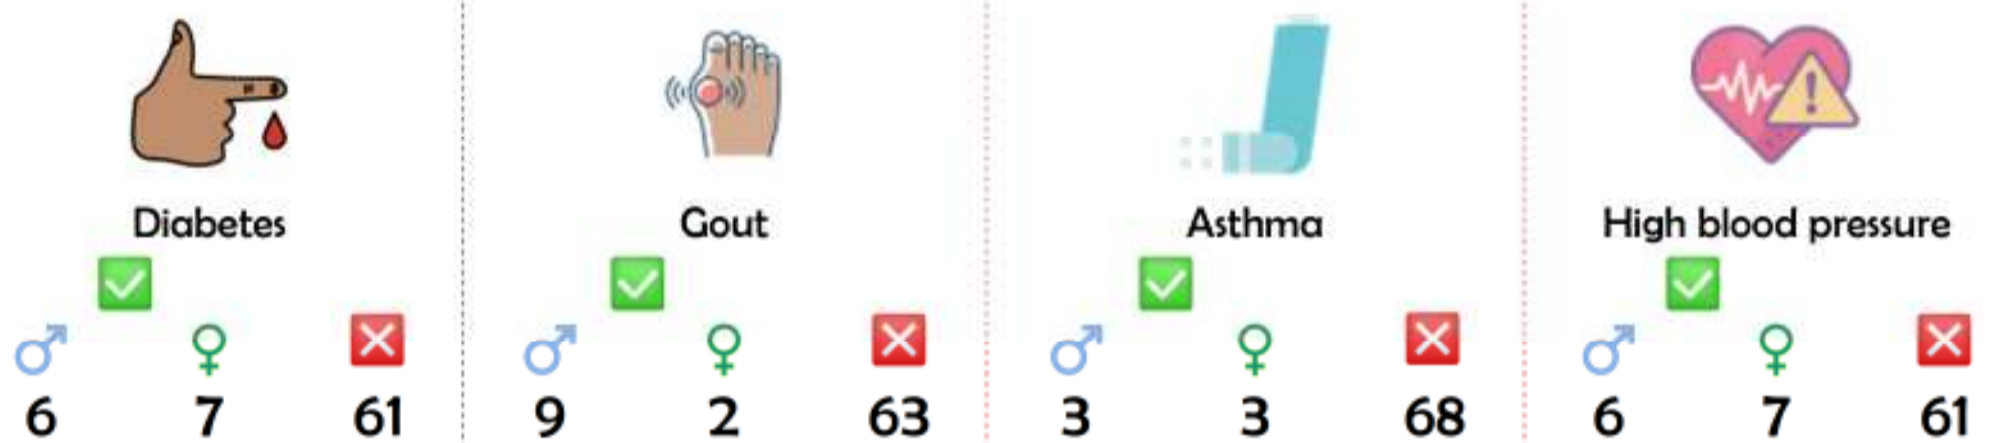

Difficulties with everyday activities

The 93 people in our village aged 5 years and older were asked about their level of difficulty with 6 everyday activities.

Non-communicable diseases

The 74 people in our village aged 15 years and over were asked about four health conditions

Only gout seemed to affect one sex more than the other, around four times as many males had gout

Cigarette, alcohol and kava consumption

The 74 people in our village who were aged 15 years were asked about their cigarette, alcohol and kava consumption.

Males were more likely than females to smoke, drink alcohol and consume kava.
